

Choose the right Sprayer

Each sprayer has a different combination of seals & plastics to handle specific types of chemical products.

Automotive • Industrial • Aviation • Marine

Maximum Performance & Chemical Compatibility

Use our Chemical Compatibility Check or visit FBS website to find out what sprayer works best for your chemical application.

Chemical Compatibility Chart
www.fbsdistribution.com

Why is it important to use the right sprayer?

- Seals will last longer and withstand chemicals that they are designed for.
- The pump sprayer will maintain pressure consistency.
- Plastics will resist permeation against the recommended chemicals.
- Improved workflow and efficiency by using the correct sprayer.

Features

- Durable construction bottle - impact resistant & sturdy, designed for heavy use.
- Easy pump operation - spray pressure up to 4bar (58.0 psi)
- Ergonomic handle for comfortable operation
- Adjustable spray nozzle with nickel plated brass insert
- Enclosed end-cap design for superior pump performance

Benefits

- Increased work productivity and efficiency in surface preparation before, and after repairs.
- Reduction of VOC's while dispensing bulk chemicals - eliminating the need for aerosol-based products.
- Compatible with waterborne cleaners and solvents.

High Quality Spraying Solutions

FBS has been committed to finding better solutions since 1989.

We are the only company globally that can recommend the correct sprayer for a specific chemical product due to extensive research, design and development.

Each sprayer is designed with quality engineered materials for a specific application / chemical type.

All FBS sprayers are manufactured in Germany with the highest attention to detail and precision.
