50400 Expert FKM/PA

1.8 l (1.9 U.S. quart)

1/4" connector for
compressed air
charge or manual
pump option

Why is it important to use the right sprayer?

- Seals will last longer and withstand chemicals that they are designed for.
- The pump sprayer will maintain pressure consistency.
- Plastics will resist permeation against the recommended chemicals.
- Improved workflow and efficiency by using the correct sprayer.

Each sprayer has a different combination of seals & plastics to handle specific types of chemical products.

Features

- Durable construction bottle - impact resistant & sturdy, designed for heavy use.
- Easy pump operation - spray pressure up to 4bar (58.0 psi)
- Ergonomic handle for comfortable operation
- Adjustable spray nozzle with nickel plated brass insert
- Enclosed end-cap design for superior pump performance

Benefits

- Increased work productivity and efficiency in surface preparation before, and after repairs.
- Reduction of VOC's while dispensing bulk chemicals - eliminating the need for aerosol based products.
- Compatible with waterborne cleaners and solvents.

50401 EPDM-FPV/FPE

1.8 l (1.9 U.S. quart)

50402 KPV/FPE

High Quality Spraying Solutions

FBS has been committed to finding better solutions since 1989.

We are the only company globally that can recommend the correct sprayer for a specific chemical product due to extensive research, design and development.

Each sprayer is designed with quality engineered materials for a specific application / chemical type.

All FBS sprayers are manufactured in Germany with the highest attention to detail and precision.
